Project (DESIGN AND FABRICATION OF 4 WHEEL STEERING MECHANISM)

- This four wheel steering mechanism is made by using mild steel & laser cutting.
- This project makes use of linkage mechanism, where the front wheels & rear wheels are connected to each other with the help of link in such a way that both the front wheels & the rear wheels turn simultaneously.
- These links are connected to the motor which will make the wheels turn.
 1. At low speed, rear wheels turn in direction opposite to that of front wheels.
 2. At high speed, the rear wheels are turned in the same direction of front wheels.
